

## Personal Health Series Online Safety

Name: Date:

## Internet + X Behavior Might = Y Result

Instructions: Match each of the risky behaviors in the left column with a possible consequence in the right column by drawing lines to connect the pairs.

## **RISKY BEHAVIOR**

Posting an online message that a family is going on vacation next week.

Writing a funny story about a friend on a social networking site.

Using easy-to-remember password like "12345" or "password" to sign onto a social networking site.

Giving an email address to someone in a chat room.

Sharing a cell phone number with a friend of a friend on a social networking site.

Downloading a movie file from a file-sharing website.

Meeting someone online then agreeing to meet them face-to-face.

## **POSSIBLE CONSEQUENCE**

The file is infected with a virus, causing the computer to stop working.

The person turns out to be a dangerous adult.

Someone starts sending spam texts to the cell phone, running up the monthly bill.

Someone guesses the password, signs on, and makes inappropriate comments in the chat room, getting the password-lazy person in trouble.

Someone burglarizes their home while they're away.

The friend gets angry about private information being shared.

Someone starts e-mailing disturbing pictures and writing inappropriate messages.
