

Health Problem Series Smoking

Money Going Up in Smoke Answer Key

Instructions: If each pack of cigarettes costs \$6, calculate how much a smoker would spend in a year if he or she smoked the amounts listed below. Then write down what you might do with each amount of money.

1 Pack Per Week

\$6 X 52 weeks

Total for year: \$312

Half a pack a day

\$6 / 2 X 365 days

Total for year: \$1,095

1 pack a day

\$6 X 365 days (or \$1,095 X 2)

Total for year: \$2,190

1.	With the amount of money from a pack of cigarettes a week, I could:
2.	With the amount of money from a half a pack of cigarettes a day, I could:
3.	With the amount of money from a 1 pack of cigarettes a day, I could:
